

## Features

- **Extended Stroke Length:** With an impressive 240mm stroke length, Tono DM 350 caters to a variety of installation requirements, ensuring smooth and full extension for versatile positioning.
- **Motorized Excellence:** Say goodbye to manual adjustments! Our advanced motorized mechanism guarantees seamless, quiet, and consistent motion every time.
- **Dual Usage Design:** Designed thoughtfully for UST projectors, this mechanism can be seamlessly integrated inside a drawer or placed gracefully atop a table, offering maximum flexibility.
- **Robust & Reliable:** Crafted from high-grade materials, the Tono DM 350 promises durability and a long service life, even with regular use.
- **Safety First:** Built-in safety features ensure the mechanism stops if an obstruction is detected, protecting both the equipment and users.
- **Easy Installation:** With its user-friendly design, the Tono DM 350 is a breeze to install, making your setup process swift and hassle-free.
- **Sleek Aesthetics:** Its minimalist and compact design ensures it complements any room décor while keeping your UST projector discreet and tidy.

## Why Choose Tono DM 350?

- **Space-Saving:** Its intelligent design optimizes space, making it ideal for both home theaters and professional setups.
- **Convenience at Fingertips:** With motorized control, managing your projector setup is just a click away.
- **Adaptable:** Suitable for a wide range of UST projectors, the Tono DM 350 is the choice for those who seek versatility.
